

Dear Customer,

Har du kjøp en nettverksport som du ikke får online, da kan du følge denne guiden.

Our Salus Smart Home app has been replaced by **Salus Premium Lite** app.
Please download the Premium app (for Android or iOS) and install it on your mobile device.

<https://apps.apple.com/dk/app/salus-premium-lite/id1614793141>

<https://play.google.com/store/apps/details?id=com.salus.eu.smarthome&hl>

Works with:
SALUS Premium Lite

If you have a different operating system on your mobile, try using this link to install the app:

https://app-release-salus-euprod.s3.eu-central-1.amazonaws.com/EU_0.70.5_330.apk

You can also access your Salus Premium Lite system via browser: Not for security update.

<https://eu.premium.salusconnect.io>

Once you have installed the Premium App, you are now ready to register your UGE600 gateway. During registration you might get the message “Gateway Security Profile Update Required”

To update Security Profile on your UGE600 please follow below points to access your gateway in Local WIFI mode.

1. **Please make sure your mobile device is connected to the same local network (your gateway and mobile need to have the same IP address).** Wait until the gateway color turns green (or blue).
2. Select “Local WiFi mode” on the login page,

3. Select your gateway (if multiple, identify them by the number on the back label **EUID**). Click on the “camera” icon.

4. Scan the QR code on your gateway label. When done, the EUID field will be populated automatically. Click save. Gateway needs to be powered ON all the time.

5. Once you get to this step, please click the small “cog” symbol and scan your system.

6. Once the scan is complete, click on the “cloud” icon (OTA) to trigger software updates for the gateway.

- Please wait a few minutes for the update. Then scan your system again. You may be required to trigger an additional update. During updates, your gateway will turn red (when rebooting) and then green and finally blue.

- Once the final update is completed, the “cloud” symbol will no longer appear. Please click the Menu icon and Logout.

9. Sign up for a new account or Sign in to your account again and add your Gateway. Continue the device(s) set-up procedure, as shown in the gateway user manual.
